## **Spiritual Determinism:** 4 hours (ref: safrica\_determinism\_00X)

Evil loves the intellectual voids of ignorance and superstition, where it draws nourishment from its requisite victims. Murderer, liar, thief and satyr swim in the naivete of mankind's gullibility, especially wherever credulous minds are devoted to institutions that link political and religious rituals to false or incomplete doctrines. This brief series describes absolute spiritual law and default consequences should they be ignored, which is largely the case. Dr. Zaid also defines the set of responsibilities we too often abandon to those who practice and abet evil. **Concepts** and **keywords** outlined below are interwoven and placed in perspective throughout the synthesized narratives of each lecture. It will be helpful if a faculty member is assigned to help guide students through each lecture because much of what is discussed is at university or post-graduate levels. Careful review will find strong correlations with previously presented lectures. NB: all that is described herein is universally experienced as witnessed by history regardless of proclaimed faith.
